

## Honeycup

**Plant Botanical Name:**

*Zenobia pulverulenta*

**USBG Plant Location:**

National Garden

**Sunlight:**

full sun

**Plant Soil Type:**

average to moist

**Plant Moisture Requirements:**

moist

Zenobia pulverulenta is the sole species in the genus Zenobia. Its common name honeycup comes from the fact that the flowers, which appear in the spring, are quite fragrant. The foliage has a bluish appearance and beautiful fall color.
