### 10 Native Wetland Plants

**Golden club** *Orontium aquaticum*
- Native, clump-forming monocot with narrow, strap-like leaves in a showy spring bloom to 1.5 ft. tall. Many native and non-native varieties are available.
- Great for full sun or partial shade.

**Yellow pond lily** *Nuphar advena*
- Native, hardy perennial with yellow flowers in late spring to early summer. Great for full sun or partial shade.

**Morningstar sedge** *Carex grayi*
- Native, hardy sedges with narrow, blue-green leaves in late spring. Great for full sun or partial shade.

**Virginia iris** *Iris virginica*
- Native, hardy perennial with blue or purple flowers in late spring. Great for full sun or partial shade.

**Pickeralweed** *Pilularia globulifera*
- Native, hardy perennial with large, blue flowers in late spring. Great for full sun or partial shade.

**Rose mallow** *Hibiscus moscheutos*
- Cultivated worldwide with many varieties available, this native species offers a range of purple flowers that are spectacular in summer.

**Duck potato** *Sagittaria latifolia*
- Native, clump-forming perennial with showy, spiky flowers in early summer. Great for full sun or partial shade.

**Cardinal flower** *Lobelia cardinalis*
- A native annual with showstopping red flowers, perfect for full sun or partial shade.

**Swamp rose** *Rosa palustris*
- Native, hardy perennial with pink flowers in late spring. Great for full sun or partial shade.

**Buttonbush** *Cephalanthus occidentalis*
- Native, hardy shrub with showy, white flowers in late summer. Great for full sun or partial shade.

Water gardens can bring calming sounds and peaceful views. In containers or ponds, with plants that can vary from full sun to partial shade, there are many native plants to make your water garden shine.

**Golden club** *Orontium aquaticum*
Yellow, club-like inflorescences rise in early spring followed by handsome blue-green leaves. Non-spreading and a great choice for small ponds.

**Morningstar sedge (Carex grayi)**
In summer, wands of inflated, spiny pale green fruit give this species another common name, mace sedge, because of their resemblance to medieval clubs. Semi-evergreen grassy leaves bring winter beauty.

**Pickerelweed (Pontederia cordata)**
A summer beauty featuring tall leaves and stalks of lilac-blue flowers. Attractive to bees and butterflies, including the native bee Dufourea novae-angliae, for which it is the sole nectar source.

**Duck potato (Sagittaria latifolia)**
Robust, arrow-shaped leaves are complemented by white flowers that bloom throughout summer. The common name is a nod to the edible underground tubers.

**Swamp rose (Rosa palustris)**
Soft-pink spring flowers give way to showy red fruits ("hips") in fall and winter. Glorious red fall foliage on shiny mahogany twigs makes for an all-season beauty.

**Yellow pond-lily (Nuphar advena)**
Simple, elegant yellow flowers rise just above the water, complementing the floating, arrowhead-shaped leaves of this water lily relative.

**Virginia iris (Iris virginica)**
Purple spring growth is followed by fans of bright green leaves and graceful lilac-blue flowers. Related species I. versicolor (northern blue flag) and I. prismatica (slender blue iris) are equally lovely.

**Rose mallow (Hibiscus moscheutos)**
Cultivated worldwide with many stunning hybrids, this American native species features large white or pink flowers that are spectacular in summer.

**Cardinal flower (Lobelia cardinalis)**
A mid-summer showstopper with intensely red blooms, cardinal flower’s nectar is a favorite of hummingbirds who pollinate the flowers while probing for food.

**Buttonbush (Cephalanthus occidentalis)**
Globes of white, fragrant flowers peak in June, attracting pollinators including Swallowtail butterflies. A large shrub, it is great for rain gardens due to its preference for average-to-wet soils.
Plants are important sources of food and shelter for many birds, mammals, and insects. Here are 10 of our favorite native plants to help bring animals to your garden.

1. **Serviceberry, shadbush (Amelanchier spp.)**
   Spring flowers supply nectar to early pollinators, and leaves are favored by many butterfly larvae including the beautiful Red-spotted Purple butterfly (Limenitis arthemis). Creatures great or small, feathered or furred favor the tasty fruit.

2. **Swamp titi (Cyrilla racemiflora)**
   Early summer white blooms teem with bees, followed by yellow-brown fruits in late summer and a long show of brilliant scarlet fall foliage. Hardy north of its native range in the southern United States.

3. **Yadkin River goldenrod (Solidago plumosa)**
   Extremely rare, this late season goldenrod provides nectar for a bevy of pollinators via wide plumes of golden flowers on red-purple stems.

4. **Oak (Quercus spp.)**
   Oaks provide food for more butterfly and moth larvae than any other tree genus in North America, and there are oak species native to just about every climate and soil type.

5. **Wild senna (Senna hebescarpa)**
   Showcasing tall spikes of golden flowers from mid-to-late summer, wild senna is popular with bumble bees and is an important larval host for Sulphur butterflies.

6. **Pawpaw (Asimina triloba)**
   A small tree with large leaves that bears the biggest edible fruit of any American native plant. For delicious and abundant fruit that is sought after by both birds and mammals, this tree is well worth the effort.

7. **Swamp milkweed (Asclepias incarnata spp. paetinata)**
   Clusters of dusty pink flowers hug each purple pole-like stem, which serve as a good larval host for Illinois milkweed butterflies.

8. **American beautyberry (Callicarpa americana)**
   Dark purple autumn berries mix well with a myriad of other fall colors, providing a top-notch food source for birds.

9. **Oak (Quercus spp.)**
   Oaks provide food for more butterfly and moth larvae than any other tree genus in North America, and there are oak species native to just about every climate and soil type.

10. **Golden Alexanders (Zizia aurea)**
    A native that is blooming at the same time as wild senna, golden alexanders offer food for butterflies, bees, and other pollinators.
plant two or more grafted cultivars because this tree is not self-fertile.

**Swamp milkweed (Asclepias incarnata ssp. pulchra)**
Clusters of dusty-rose flowers highlight this pollinator magnet, which also serves as a good larval host for the Monarch butterfly.

**American beautyberry (Callicarpa americana)**
Soft-yellow autumn leaves make way for spectacular clustered purple fruits in autumn and winter that are relished by birds.

**Winterberry holly (Ilex verticillata)**
In the winter season when resources are scarce, this holly's shiny red berries soften over the cold months and offer food to birds in need of a meal.

**Golden Alexanders (Zizia aurea)**
A native host for Black Swallowtail butterfly larvae, golden Alexanders attract a bounty of pollinators with late spring golden flower clusters.
Slower to spread than other goldenrod species, this goldenrod thrives in sun and well-drained soils. Beyond being beautiful, its glossy, licorice-scented leaves are also used in herbal teas.

**Trailing phlox (Phlox nivalis)**
For a pop of white-to-pink in early spring, seek out this slowly spreading, evergreen groundcover. Its flowers sometimes open earlier, bringing a splash of color during mild winter weather.

**Rattlesnake plantain (Eryngium yuccifolium)**
Rosettes of gray-green foliage highlight greenish-white globes of summer flowers that are a favorite of many pollinators.

**Smooth aster (Symphyotrichum laeve 'Bluebird')**
Attractive clumps of blue-green foliage on graceful stems yield abundant late-summer flowers featuring violet-blue rays with vibrant yellow centers.

**Butterfly weed (Asclepias tuberosa)**
Drought-tolerant with clusters of delightfully bright orange flowers that bloom from late spring to early autumn and attract butterflies. The plant is also a host for Monarch butterfly larvae.

**Eastern bluestar (Amsonia tabernaemontana)**
Ice-blue flowers in spring and bright yellow foliage in autumn make this neatly clumping plant a knockout. For dry, sandy soils, try the finer-textured *A. ciliata* (fringed bluestar).

**Crested iris (Iris cristata)**
Tiny creeper that naturally thrives in dry, wooded environments and impresses with a profusion of blue, lilac, or lavender spring flowers.

**Bowman's root (Gillenia trifoliata)**
Shrubby, shade-loving perennial features reddish-purple fall foliage and delicate, starry white spring flowers.

**Swamp sunflower (Helianthus angustifolius)**
Late season golden blooms are accented against dark green leaves on this beautiful perennial.
Shrubs can form a foundation for a garden. Some shrubs are great for their foliage, while others provide additional flowers to the garden. Here are 10 of our favorite native shrubs to try in your garden.

**Southern wax myrtle** (*Myrica cerifera*)
Pale-green foliage abounds on this large evergreen that is happiest in poor soils and needs little attention. The crushed leaves offer a warm scent similar to eucalyptus, and female specimens have gray-blue, wax-coated berries.

**Possum haw viburnum** (*Viburnum nudum*)
Clusters of flat-topped white blooms transition to colorfully ripening fruits through late summer into autumn. Smooth and shiny burgundy foliage joins this autumnal display.

**Dwarf witchalder** (*Fothergilla gardenii*)
This slow-growing dwarf ornamental is amenable to a variety of garden environments, featuring white bottlebrush blooms in spring and colorful foliage in autumn.

**Sweet pepperbush** (*Clethra alnifolia*)
White-to-pink spikes of small, sweetly-scented summer flowers make way for dark brown seed capsules that can last until winter. Popular with butterflies and bees alike.

**Red chokeberry** (*Aronia arbutifolia 'Brilliantissima'*
Though quite tall in the wild, this cultivar has a small stature and abundant shiny, red fruit that persist throughout winter.

**Ninebark** (*Physocarpus opulifolius*)
Bright green leaves showcase round, white clusters of flowers in the late summer and early spring. Mature branches feature peeling bark, showcasing layers of red, light brown, and orange during the winter.
inner bark, most visible and vibrant during the winter.

**Shrubby St. John's wort (Hypericum prolificum)**
A profusion of bright gold summer flowers sprinkled across a palate of dark green leaves make this compact and soil-adaptable plant a fine addition to any landscape.

**Mountain azalea (Rhododendron canescens)**
An abundance of sweet-scented spring flowers and a tolerance for moist or dry environments make this deciduous native a great choice for Southeastern gardens.

**New Jersey tea (Ceanothus americanus)**
This small shrub features white blooms in spring and fixes its own nitrogen, making fertilizer unnecessary. The leaves can be used to brew a caffeine-free tea.

**American holly (Ilex opaca 'Maryland Dwarf')**
Slow-spreading, attractive evergreen groundcover that comes alive with a scattering of lovely red berries in autumn and winter.

---

**10 Native Large Trees**

Trees can provide vertical height, shade, and sources of food and shelter for people and critters. Here are 10 of our favorite large trees to bring plentiful shade to your garden.

- **Sweetgum (Liquidambar styraciflua)**
  Star of urban environments with beautiful fall color and spiny, spherical fruits in fall and winter. Cultivars offer variety in leaf forms and fruitlessness.

- **Southern magnolia (Magnolia grandiflora)**
  Glossy, evergreen leaves with velvety, brown undersides highlight this southern belle's spectacular plate-sized white summer flowers and cone-like, red-seeded fruits.

---

---
winter.

**Pond cypress (Taxodium ascendens)**
Finely textured, bright green foliage fades to a decadent orange-brown in the autumn. This conical conifer can grow in the toughest of soil conditions and has the potential to form "knees."

**Eastern hop-hornbeam (Ostrya virginiana)**
Medium height, a rounded crown, beautiful flaking bark, and tolerance of urban soils make this a great tree for space-limited landscapes.

**Black gum (Nyssa sylvatica)**
Prized red fall foliage on a majestic branching pattern, this beekeeper favorite is the nectar source for tasty tupelo honey.

**Longleaf pine (Pinus palustris)**
Eye-catching long needles make a bold statement for this evergreen conifer. Not ideal for colder, snowier climates, it thrives in warmer areas.

**Sourwood (Oxydendrum arboreum)**
Somewhat weeping branches bear white summer flowers in elegant lily-of-the-valley-like sprays from which bees make sourwood honey. Yellow-to-maroon fall foliage is spectacular.

**American holly (Ilex opaca)**
Sharp, pointy green leaves and the bright red berries of female trees are a familiar sight for many tree lovers. Tough as nails, this evergreen develops into a large pyramidal tree in full sun.

**Eastern red cedar (Juniperus virginiana)**
Tough and fast growing, this evergreen has fragrant cedar-scented wood. Female trees bear waxy, blue cones relished by cedar waxwings and other birds. Short cultivars may be more suitable for home gardens.

**American persimmon (Diospyros virginiana)**
Late spring blooms, beautiful fall foliage, and bark reminiscent of alligator skin lend interest in all seasons. The attractive, edible fruit is sweet and aromatic.
Sometimes you want the look and benefits of a tree, but don't have a lot of space. These 10 favorite small trees will retain their size, perfect for compact gardens.

### Sassafras (*Sassafras albidum*)
Light green, mitten-shaped leaves change from yellow to orange to brilliant red in autumn. Greenish-yellow female flowers produce draping clusters of striking red and black fruits.

### Red buckeye (*Aesculus pavia*)
Large early-spring leaves are quickly followed by mid-spring showy spikes of deep red flowers that attract hummingbirds. Buckeyes are cluster-forming and can be grown as a screen.

### Downy serviceberry (*Amelanchier arborea*)
Beautiful white flowers in early spring are followed by delicious red-to-dark-purple, edible fruits in late spring or early summer.

### American hornbeam (*Carpinus caroliniana*)
Reddish fall foliage is a delight, and seeds are devoured by birds and small mammals. Smooth, gray bark on sinewy trunks imparts another common name, musclewood.

### Flowering dogwood (*Cornus florida*)
Revered for white-to-pink, flower-like springtime bracts, the open-branching, checkered bark and attractive, red-tinged autumn foliage are also stunning.

### Eastern redbud (*Cercis canadensis*)
An elegant repeat of native spring blooms along the creeks and edges of woodlands, with leaves turning red and pink before the flowers open.
An elegant blush of edible spring flowers along the trunk and branches is followed by delicate, heart-shaped leaves emerging as the legume fruits mature.

**Sweetbay magnolia (Magnolia virginiana)**
Cup-shaped, creamy-white flowers nicely contrast against matte-green leaves in the early summer. Come autumn, cone-like fruits with exposed red seeds offer a beautiful show.

**Chalkbark maple (Acer leucoderme)**
Spectacular autumnal foliage and its easy care make this tree a delight for any garden. When mature, its smooth, pale bark earns its common name.

**Fringe tree (Chionanthus virginicus)**
A pleasantly rounded canopy, wispy white mid-summer blooms, and suspended purple autumn fruits highlight this adaptable and tough urban garden selection.

**Fox Valley® river birch (Betula nigra 'Little King')**
Impressive orange-brown bark sloughs away to reveal light brown inner bark, adding a pop of whimsy year round. Known for its disease resistance, it is also adaptable to a variety of environments.

---

**Roses**

The rose is America's national floral emblem, and it is a favorite flower and plant for many gardeners. Here are 10 of our favorite varieties.

**Green Ice (Rosa)**
One of the few miniature roses showing very good disease resistance. Buds open to small, lightly scented greenish double flowers that age to white. Hardy, and good for containers.

**Natchez Rose (Rosa 'POUllen')**

A wonderful groundcover featuring finely textured, glossy foliage studded with small, pale-pink semi-double flowers with a long blooming season.

**Rosa 'Mrs. Dudley Cross'**

Nearly thornless, producing beautifully red new foliage and creamy yellow/pink flowers. Great for mixed borders with a nice repeat bloom in autumn.

**Rosa 'Therese Bugnet'**

Prickly stems are beautifully burnished red in winter, while mildly fragrant, stunning pink double flowers emerge late spring through early autumn.

**Sweet Fragrance Rose (Rosa BALnce)**

Long-blooming, peach double flowers are richly fragrant and disease resistant.

**Pretty Lady aka 'Easy-to-Love(tm)' (Rosa 'SCRivo')**

Reliably disease-resistant foliage with mildly fragrant, pearl-pink ruffled double petals that bloom over an extended flowering season.

**Rosa 'Ducher' (Rosa 'Bengale Ducher')**

Tidy and manageable over a long blooming season. Produces delightful red new foliage and young stems that contrast nicely with lightly fragrant, small white double flowers.

**Rosa 'Natchitoches Noisette'**

Loose, upright stems with clean foliage and spicy-scented, lavender-pink semi-double flowers bloom over a very long flowering season.

**Rosa chinensis forma mutabilis**

Single flowers change from yellow to rose, making a whimsical display on this large, healthy, long-blooming shrub.

**The Pilgrim (Rosa AUSwalker)**

This shrub rose features fully double, light yellow flowers emit a lightly spicy fragrance. Reliable, long blooming, and possessed of very good disease resistance.
