

You Can Grow It! at U.S. Botanic Garden answers visitors' top plant care questions

Washington, DC - The U.S. Botanic Garden (USBG) presents a new e

from February 18 through October 15, 2017. The indoor and outdoor exhibit showcases tips and answers to some of the questions visitors ask most frequently about growing plants in their own homes and gardens, including how to choose the best plant for their space and care abilities.

The exhibit will provide answers to common issues about lighting, watering, fertilizing, and pests, as well as how to rescue a plant that experiences problems. To help visitors determine what kinds of plants they can grow where they live, visitors can find tips based on which direction their window(s) face in a four-panel "house" diorama.

"No one is born with a green thumb," said Ari Novy, executive director. "Gardening is life-long learning leading to an ever-greening thumb, and plants, over time, can improve your life. *Grow It!*, the U.S Botanic Garden is excited to share our horticultural expertise. This exhibit will provide valuable tips for expert gardeners and beginners alike to make your life healthy and beautiful."

The Conservatory gallery will feature separate sections with tips on topics such as foolproof plants (for those with a less-than-bright-green thumb); today's popular tropical house plants; seasonal plants like amaryllis, Christmas cactus, poinsettia, and more; expert care tips on orchids, carnivorous plants, and others; tips on growing from seeds and cuttings; and even hydroponics. Outdoors, *You Can Grow It!* will showcase plants for growing outdoors including items for kitchen use like herbs, and container gardening, and more.

Throughout the exhibit run, the USBG will offer programs, workshops, lectures, tours, and cooking demonstrations to showcase and provide training on growing plants. Visit www.USBG.gov/YouCanGrowIt to learn more about the exhibit and associated programs.

The U.S. Botanic Garden is open to the public, free of charge, every day of the year from 10 a.m. to 5 p.m. The Conservatory is located at 100 Maryland Avenue, NE, on the east side of the U.S. Capitol. Visitors are encouraged to use Metrobus and Metrorail. More information is available at www.USBG.gov

About the U.S. Botanic Garden

The United States Botanic Garden (USBG) is one of the oldest botanic gardens in North America. The Garden informs visitors about the importance and diversity of plants, as well as their aesthetic, cultural, economic, therapeutic and ecological significance. With over a million visitors annually, the USBG promotes sustainable practices. The U.S. Botanic Garden is a living plant museum accredited by the American Alliance of Museums. www.USBG.gov
