

Pink lady-slipper

Plant Botanical Name:

Cypripedium acaule

USBG Plant Location:

Not in Bloom

Sunlight:

Some shade

Plant Soil Type:

Acidic loamy soil

Plant Moisture Requirements:

Low

Plant Threat Level:

Threatened

Pink lady-slipper has a range from Newfoundland to Saskatchewan south around the Great Lakes through the southern Appalachians and is mostly found under deciduous and evergreen trees. Although prevalent in much of its range, it is protected in Georgia, Illinois, New York and Tennessee due to urban sprawl.
