

Lecture: Orchids: Evolution, Physiology, and Biogeography of the Floral Rainbow

Event Date:

Sat, Feb 24, 2018

Todd Brethauer, USBG Science Education Volunteer

Learn about the evolution, biogeography, physiology, and ecology of orchids in conjunction with *Orchid Spectrum*. Orchids form one of the largest groups of plants on Earth, with a history that goes back to the age of dinosaurs. They are remarkable for the beauty and diversity of their blooms, the range of environments they occupy, and their relationships with their pollinating animals. Learn about how modern research methods are being used to better understand and conserve these plants.

DATE: Saturday, February 24

TIME: 10:30 a.m. to 12 p.m.

LOCATION: Conservatory Classroom

FREE: **This program is full**
