We thank you for thinking of the U.S. Botanic Garden as an extension of your classroom. In addition to the rich offerings we have for students, we offer a variety of courses, workshops and teacher trainings to support you in teaching plant science, STEAM and environmental science. Professional Learning Units (PLUs) are offered for each of the professional development offerings.

Please check our calendar of events for dates and additional information.

**DC Teacher Night**

We are very excited to continue our collaboration with the DC Environmental Education Consortium to offer DC Teacher Night. This is an environmental education evening for all DC area educators. We invite 40 environmental organizations together and under one roof, educators can learn about the diversity of offerings for both teachers and your students, in and outside of the classroom.

**Professional Development Outreach**

Wish you could get to the Garden for training but stuck at your school? Consider incorporating one of our professional development offerings into an established professional development day or, as an evening program at your school. Programs last 60 - 90 minutes and support you in STEAM and inquiry training for grades Pre-K - 12. Please contact Lee Coykendall, Senior Education Specialist, at lee.coykendall@aoc.gov for additional information.
