

## White Japanese anemone

**Plant Botanical Name:**

*Anemone x hybrida*

**Plant Sub Species or Variety:**

'Honorine Jobert'

**USBG Plant Location:**

Conservatory

**Sunlight:**

Part shade to full sun

**Plant Soil Type:**

Average garden soil

**Plant Moisture Requirements:**

Medium, although prefers consistent moisture

*Anemone x hybrida* 'Honorine Jobert' is an outstanding garden plant for the Mid-Atlantic region. It is an old garden hybrid and is sometimes sold as *Anemone Jobert* or *A. x hybrida* 'Alba.' Once established, it is relatively low maintenance and has showy white flowers from August through frost. When grown in g protected from hot dry conditions and afternoon summer sun, it should eventually naturalize and spread into colonies up to two feet across. It does not p soils or particularly excessive winter dampness.
