21 U.S. Urban Agriculture Public Garden-Community Partner Collaborations Awarded Funds

June 23, 2021

The United States Botanic Garden (USBG) and American Public Gardens Association (Association) have partnered to support public gardens and their community partners engaging in urban agriculture and food-growing to address food security challenges exacerbated by the COVID-19 pandemic. This week, the USBG and the Association awarded $403,450 to 21 public garden partnerships across the United States that will foster public engagement and education in urban food growing and build capacity in urban agriculture programs. The Urban Agriculture Resilience Program aims to strengthen collaborations, promote resilience, and gather best practices from across the U.S.

These funds will help participating programs in 16 states and Washington, D.C. integrate urban food growing and education while addressing food insecurity facing their communities. The program seeks to leverage the strength of public gardens working with partners in their communities, ranging from schools, universities, and urban farms to food pantries, community gardens, local government agencies, and nonprofit organizations. The Urban Agriculture Resilience Program will provide insight into successful approaches and future opportunities for public gardens and their partners to creatively utilize their unique assets to advance food and agriculture education in urban communities.

"The past year has underscored the widespread interest in, and need for, urban agriculture programs that address food insecurity. We are excited to build on last year’s Urban Agriculture Resilience Program and support innovative collaborations between public gardens and diverse partners in their communities," said Saharah Moon Chapotin, executive director of the U.S. Botanic Garden. "It’s inspiring to see these partners coming together to extend the reach and deepen the impact of their programs."
"We are proud to continue to partner with the U.S. Botanic Garden and offer these awards that provide opportunities to directly address knowledge gaps and food insecurity in communities nationwide," said Casey Sclar, executive director of the American Public Gardens Association. "Through these awards we also will continue to gain knowledge of what makes successful partnerships possible, helping more gardens to be the resilient centers of their communities."

The Urban Agriculture Resilience Program began in 2020 as a way for the USBG and the Association to help public gardens continue urban agriculture and food growing programs facing funding and capacity challenges due to COVID-19.

Public garden and community partner collaborations awarded 2021 funding include:

**Alabama**

**Arizona**
* Desert Botanical Garden, in collaboration with Unlimited Potential, TigerMountain Foundation, The Orchard Community Learning Center, and Roosevelt School District
* The Gardens on Spring Creek, in collaboration with Food Bank for Larimer County

**Colorado**
* The Gardens on Spring Creek, in collaboration with Food Bank for Larimer County

**Delaware**
* Delaware Center for Horticulture, in collaboration with Pennsylvania Horticultural Society

**District of Columbia**
* Friends of the National Arboretum, in collaboration with the U.S. National Arboretum

**Georgia**
* Atlanta Botanical Garden, in collaboration with Friends of Refugees and Global Growers Network
* Trees Atlanta, in collaboration with the City of Atlanta Mayor's Office of Resilience and the City of Atlanta Department of Parks and Recreation

**Illinois**
* The Morton Arboretum, in collaboration with Homan Grown, Stone Temple Baptist Church, and Permaculture Chicago Teaching Institute

**Michigan**
* University of Michigan Matthaei Botanical Gardens and Nichols Arboretum, in collaboration with Oakland Avenue Urban Farm, Detroit Black Community Food Security Network D-Town Farm

**Minnesota**
* Minnesota Landscape Arboretum, in collaboration with Pillsbury United Communities, WE WIN Institute, St. Paul City Schools, Plymouth Christian Youth Place, North Point Health & Wellness Center Community Food Shelf, and CAP Agency Food Shelf

About the United States Botanic Garden
The United States Botanic Garden (USBG) is the oldest continuously operating public garden in the United States. The Garden informs visitors about the intrinsic fundamental value and diversity of plants, as well as their aesthetic, cultural, economic, therapeutic, and ecological significance. With over a million visitors annually, the USBG strives to demonstrate and promote sustainable practices. The U.S. Botanic Garden is a living plant museum accredited by the American Alliance of Museums and Conservation International. www.USBG.gov

About the American Public Gardens Association
The American Public Gardens Association is the leading professional organization for the field of public horticulture. We advance the field by encouraging best practices, offering educational and networking opportunities, and advocating on behalf of our members, our programs and public gardens worldwide. We work together with our members and others to strengthen and shape public horticulture, providing the tools and support industry professionals need to better serve the public while preserving and celebrating plants creatively and sustainably.

Since 1940, we have been committed to increasing cooperation and awareness among gardens. Our members include more than 600 institutions, spanning 49 states, the District of Columbia, Canada, and 20 countries. Our members include, but are not limited to, botanic gardens, arboreta, zoos, museums, colleges and universities, display gardens, and research facilities.
