

Atlas orchid

Plant Botanical Name:

Paphiopedilum baldet

Plant Sub Species or Variety:

'Atlas'

Paphiopedilums are wonderful orchids for the home, requiring conditions normal in most residences. Indirect sun from an east, west or shaded southern window between 55 at night and 85 during day is needed along with about 60 percent humidity. In the home humidity can be provided by a spray bottle or from pebbles in water. Repotting maybe needed ever couple of years as most orchid potting mixtures break down rapidly. In addition to adequate light, a dilute fertilizer application is required for health and flowering.
