

## Hearts of gold orchid

**Plant Botanical Name:**

Cymbidium

**Plant Sub Species or Variety:**

'Hearts of Gold'

**USBG Plant Location:**

Conservatory

**Conservatory Room Location:**

Garden Court

**Sunlight:**

Filtered indirect sunlight

*Cymbidium* orchids are typically easy to grow and produce an abundance of flowers on each spike. They perform best with indirect filtered sunlight, which produces yellowish/green foliage instead of deep green. They should be kept moist and fertilized with a high nitrogen fertilizer from July through November and a lower nitrogen fertilizer December through June. A slow release fertilizer could be applied in the fall and mid-spring.
