Programs & Events

Education is core to the mission of the U.S. Botanic Garden. It is our vision for visitors to understand, wonder, experience, grow and connect to plants in the garden. We create opportunities to inspire our visitors to learn about the importance of plants and present a variety of educational programming. Led by our staff, our programs and events offer something for every age, interest and skill level. With so many options to choose from each year, you will find something that teaches you more about the wonder of plants at the Garden!

Download a PDF version of our 2019 Calendar of Events (June - August 2019) We look forward to seeing you at the Garden soon!

Teachers and Schools

Teachers are welcome to bring students to visit the Garden for their own educational activities or to use one of the programs on our Field Trips page. No fee is required. You may reach out to Lee Coykendall, Children's Education Specialist, as you plan your trip to the U.S. Botanic Garden.

Our *How Plants Work: A Guide to Being Green* is a plant-based curriculum designed to help students explore four Big Ideas during a visit to the Conservatory.

Kids

While at the Conservatory, enjoy our living classroom and explore a world of plants all year round!

Educational Resources

Looking for more educational opportunities and resources? From botanical art and illustration to sustainable gardening, you'll find additional education s
